# A/B Test Results Tracker

## Top 10 Posts | Metabolic Dominance Campaign

Prepared June 2026 | For internal content production and scheduling use only

### How to Use This Tracker

*After each 7-day cycle, pull metrics for the post that ran and enter them in the relevant row below. After all three cycles are complete for a given post, review the numbers and record your declared winner at the bottom of that section. These records become the evidence base for your permanent house style decisions.*

#### Pulling Metrics from Instagram Insights

1. Open the Instagram app and go to your profile.
2. Tap the post, then tap **View Insights** beneath it.
3. Record **Reach** (unique accounts reached), **Saves**, and **Shares** from the Interactions panel.
4. DMs: note any direct messages received in the 48 hours after publishing that reference the post topic. These are not shown in Insights and must be tracked manually.
5. Enquiry spike: check whether a new enquiry form submission or consultation booking arrived within 48 hours of the post going live. Mark Y or N.

#### Pulling Metrics from LinkedIn Analytics

1. Go to your LinkedIn Page or personal profile and open the post.
2. Tap or click **View analytics** beneath the post.
3. Record **Impressions** in the Reach column, **Reposts** in the Shares column, and any saves if your account type shows them.
4. DMs: note direct messages received referencing the post topic within 48 hours. Track manually.
5. Enquiry spike: same method as Instagram. Mark Y or N.

#### Column Definitions

| Column           | What to Enter                                                                                                                     |
|------------------|-----------------------------------------------------------------------------------------------------------------------------------|
| Hook variant run | Which hook was used: Hook 0 (original), Hook A, Hook B, or Hook C. See the Caption Variations document for the full text of each. |
| Caption length   | Short or Long. Short = under 100 words. Long = 150 to 250 words.                                                                  |

| Column        | What to Enter                                                                                                              |
|---------------|----------------------------------------------------------------------------------------------------------------------------|
| Platform      | Instagram or LinkedIn.                                                                                                     |
| Reach         | Unique accounts reached (Instagram) or impressions (LinkedIn) after 7 days.                                                |
| Saves         | Number of saves after 7 days. The single strongest signal of intent on Instagram.                                          |
| Shares        | Shares or reposts after 7 days.                                                                                            |
| DMs           | Number of direct messages received referencing this post within 48 hours. Track manually.                                  |
| Enquiry spike | Y if a new enquiry or consultation booking arrived within 48 hours of this post. N if not.                                 |
| Notes         | Any qualitative observations: comment tone, unusual follower spike, algorithm boost, or context that explains the numbers. |

## Declared Winners at a Glance

Fill this table as each post completes its three cycles. Use it to spot patterns across hook styles and caption lengths.

| Post | Title                                            | Winning hook | Winning caption length | Key insight |
|------|--------------------------------------------------|--------------|------------------------|-------------|
| 01   | Meet the Surgeon Who Changed the Field           |              |                        |             |
| 13   | GLP-1 vs Surgery: A Balanced View                |              |                        |             |
| 21   | James: The Executive Who Got His Edge Back       |              |                        |             |
| 23   | Sarah: After Years of Trying, She Found Her Team |              |                        |             |
| 25   | Peter: Choosing Reversal Over Management         |              |                        |             |
| 27   | The Moment Patients Describe Most                |              |                        |             |
| 29   | The Subscription Versus the Specialist           |              |                        |             |
| 30   | What \$49 Gets You. What It Does Not.            |              |                        |             |
| 49   | Is This the Right Time?                          |              |                        |             |
| 50   | One Conversation Could Change Your Next Decade   |              |                        |             |

## 01 Meet the Surgeon Who Changed the Field

Reel | Instagram + LinkedIn | Authority and Credibility

Hook 0 is the original. Hooks A, B, C are in the Caption Variations document. Run one hook per cycle, then rotate.

| Cycle   | Hook variant run | Caption length | Platform | Reach | Saves | Shares | DMs | Enquiry spike | Notes |
|---------|------------------|----------------|----------|-------|-------|--------|-----|---------------|-------|
| Cycle 1 |                  |                |          |       |       |        |     |               |       |

| Cycle           | Hook variant run | Caption length                            | Platform | Reach | Saves | Shares | DMs | Enquiry spike | Notes |
|-----------------|------------------|-------------------------------------------|----------|-------|-------|--------|-----|---------------|-------|
| Cycle 2         |                  |                                           |          |       |       |        |     |               |       |
| Cycle 3         |                  |                                           |          |       |       |        |     |               |       |
| Declared winner |                  | Hook: __ / Caption: __ / Rationale: _____ |          |       |       |        |     |               |       |

# 13 GLP-1 vs Surgery: A Balanced View

Reel or Carousel | Instagram + LinkedIn | Education

Hook 0 is the original. Hooks A, B, C are in the Caption Variations document.

| Cycle           | Hook variant run | Caption length                            | Platform | Reach | Saves | Shares | DMs | Enquiry spike | Notes |
|-----------------|------------------|-------------------------------------------|----------|-------|-------|--------|-----|---------------|-------|
| Cycle 1         |                  |                                           |          |       |       |        |     |               |       |
| Cycle 2         |                  |                                           |          |       |       |        |     |               |       |
| Cycle 3         |                  |                                           |          |       |       |        |     |               |       |
| Declared winner |                  | Hook: __ / Caption: __ / Rationale: _____ |          |       |       |        |     |               |       |

# 21 James: The Executive Who Got His Edge Back

Reel | Instagram + LinkedIn | Patient Story

Hook 0 is the original. Hooks A, B, C are in the Caption Variations document.

| Cycle           | Hook variant run | Caption length                            | Platform | Reach | Saves | Shares | DMs | Enquiry spike | Notes |
|-----------------|------------------|-------------------------------------------|----------|-------|-------|--------|-----|---------------|-------|
